Computers & Security, 20 (2001) 246

Author Index for Volume 19

Balenson, D. 91
Barber, R. 230, 321
Barnard, L. 185
Bequai, A. 591, 688
Boni, W. 133
Bunnell, J. 645

Clarke, A. 692
Cohen, F. 520
Collins, M. 141

Dowland, P.S. 529

Eloff, M.M. 243, 698

Finne, T. 234
Furnell, S.M. et al. 529

Gallo, V. 692
Gritzalis, S. et al 731
Gupta, S. 41, 56

Henderson, R. 645
Hinde, S. 119, 222, 312, 408, 499, 585, 679
Ho, F-S. 453
Hoogenboom, M. 149, 348
Huang, Y-L. et al. 453

Illingworth, H.M. 529

Katsikas, S. 731
Kennedy, J. et al. 31
Kiountouzis, E.A. 267
Kokolakis, S.A. 267
Kovacich, G. 133, 326, 421, 505

Lekkas, D. 731

MacLean, A. et al. 69

Markham, T. 86, 91
Matyas, S. 551
Matyas, S.M. 282
Matyas, S.M. et al 369
Matyas, S.M. Jr. 31, 37, 56, 69, 428
Mora, F. 559
Moulinos, K. 731

Nosworthy, J. 337, 596

Peyravian, M. 466
Peyravian, M. et al. 282, 551
Podd, J. 645
Polydorou, E. 731
Pond, R. et al. 645

Reynolds, P.L. 529
Roginsky, A. 282, 369, 551

Sherwood, J. 710
Shieh, S-P. 453
Shoriak, T.G. 100
Smith, M. et al. 21
Stapleton, J. 428
Steemers, P. 149

Torrubia, A. 559

van Krugten, P. 348
Van Oorschot, P. 21
von Solms, B. 615
von Solms, R. 185
von Solms, S.H. 243, 698

Webb, S. 123
Willett, M. 21, 28
Williams, C. 48, 86

Zunic, N. 31, 37, 48, 69, 82, 282, 369, 466, 551

Computers & Security, 20 (2001) 247-252

Subject Index for Volume 19

Access
security for remote access and mobile applications 149

Accreditation
information security management: a hierarchical framework for various approaches 243
information security management: an approach to combine process certification and product evaluation 698

Architectures
opening up the enterprise 710

Assumption
fireworks, beer and old halfpennies - the risks of assumption 499

Asymmetric key
generation of RSA keys that are guaranteed to be unique for each user 282

Attributes
features, attributes, characteristics, and traits (FACTs) of key recovery schemes/products 28

Authentication
authentication and supervision: a survey of user attitudes 529
multiparty biometric-based authentication 369

B2C (Business to Consumer) transactions
B2C security - be just secure enough 348

Balancing factors
implementing information security in the 21st century — do you have the balancing factors? 337

Benchmarking
information security management: a hierarchical framework for various approaches 243
information security management: an approach to combine process certification and product evaluation 698

Best Practice
information security — the third wave? 615

Biometrics
a biometric standard for information management and security 428
authentication and supervision: a survey of user attitudes 529
multiparty biometric-based authentication 369

Black zone
netspionage - part III: the black zone, who uses netspionage, how and why 505

Bluetooth
security in a mobile world — is Bluetooth the answer? 321

Business
opening up the enterprise 710

Business continuity management (BCM)
a practical risk analysis approach: managing BCM risk 596

Business environment
implementing public key infrastructures in a dynamic business environment 230

Business processes
information systems risk management: key concepts and business processes 234

C2C (Consumer to consumer) security
B2C security — be just secure enough 348

Certification
fireworks, beer and old halfpennies — the risks of assumption 499
implementing public key infrastructures in a dynamic business environment 230
information security — the third wave? 615
information security management: a hierarchical framework for various approaches 243
information security management: an approach to combine process certification and product evaluation 698

Characteristics
features, attributes, characteristics, and traits (FACTs) of key recovery schemes/products 28

Code of practice
information security management: a hierarchical framework for various approaches 243

Commerce
America's Internet commerce and the threat of fraud 688

Compsec 2000
new names for old — a personal surf through Compsec 2000 679

0167-4048/01$20.00 © 2001 Elsevier Science Ltd. All rights reserved.

Subject Index Vol. 19

Computers
, do you know your organization's Achilles Heel? 585

Connectivity
security for remote access and mobile applications 149

Control
a formalized approach to the effective selection and evaluation of information security controls 185

Copyright protection
a generic electronic payment model supporting multiple merchant transactions 453

Credit cards
America's Internet commerce and the threat of fraud 688

Crime
crimes and misdemeanours: how to protect corporate information in the Internet age 128
telecommunications crime — part 3 141

Cryptography
cryptographic information recovery using key recovery 21
information security in multiprocessor systems based on the X86 architecture 559
methods for protecting password transmission 466
multiparty biometric-based authentication 369

Data retrieval
organization considerations for retrieval of stored data via key recovery methods 82

Data storage
organization considerations for retrieval of stored data via key recovery methods 82

Deception
a mathematical structure of simple defensive network deceptions 520

Defence
a mathematical structure of simple defensive network deceptions 520

Denial of service
life was simple then 222

Digital signature
ticket and challenge-based protocols for timestamping 551

Disasters
do you know your organization's Achilles Heel? 585
fireworks, beer and old halfpennies — the risks of assumption 499
life was simple then 222

Electronic commerce
a formalized approach to the effective selection and evaluation of information security controls 185
a generic electronic payment model supporting multiple merchant transactions 453
opening up the enterprise 710
securing the electronic market: the 'Keystone' public key infrastructure architecture 731

Electronic content distribution
a generic electronic payment model supporting multiple merchant transactions 453

Electronic messaging
the software colander — holes in messaging 692

Employers
romancing the Internet and management's quagmire 591

Encryption
organization implementation guidelines for recovery of encrypted information 69

Espionage
netspionage — the global threat to information, part I: what is it and why I should care? 326
netspionage — the global threat to information, part II: information collection in the gray zone 421
netspionage — the global threat to information, part III: the black zone, who uses netspionage, how and why 505

Ethics
netspionage — part III: the black zone, who uses netspionage, how and why 505
netspionage — the global threat to information, part II: information collection in the gray zone 421

Evaluation
a formalized approach to the effective selection and evaluation of information security controls 185
information security management: an approach to combine process certification and product evaluation 698

Exchange
methods for protecting password transmission 466

FACTs
features, attributes, characteristics, and traits (FACTs) of key recovery schemes/products 28

Failures
do you know your organization's Achilles Heel? 585
fireworks, beer and old halfpennies - the risks of assumption 499
new millennium, old failures 119

Features
features, attributes, characteristics, and traits (FACTs) of key recovery schemes/products 28

Fireworks
fireworks, beer and old halfpennies - the risks of assumption 499

Formulation techniques
word association computer passwords: the effect of formulation techniques on recall and guessing rates 645

Fraud
America's Internet commerce and the threat of fraud 688
telecommunications crime — part 3 141

Global systems
netspionage — the global threat to information, part I: what is it and why I should care? 326

Gray zone
netspionage — the global threat to information, part II: information collection in the gray zone 421

Guessing rate
word association computer passwords: the effect of formulation techniques on recall and guessing rates 645

Guidelines
information security management: a hierarchical framework for various approaches 243
romancing the Internet and management's quagmire 591

Hash
methods for protecting password transmission 466

Header
key recovery header for IPSEC 86

Hierarchical framework
information security management: a hierarchical framework for various approaches 243

Information
a biometric standard for information management and security 428
a formalized approach to the effective selection and evaluation of information security controls 185
a mathematical structure of simple defensive network deceptions 520
crimes and misdemeanours: how to protect corporate information in the Internet age 128
cryptographic information recovery using key recovery 21
implementing information security in the 21st century — do you have the balancing factors? 337
information security — the third wave? 615
information security in multiprocessor systems based on the X86 architecture 559
information security management: a hierarchical framework for various approaches 243
information security management: an approach to combine process certification and product evaluation 698
Internet targets 133
netspionage — the global threat to information, part I: what is it and why I should care? 326
netspionage — the global threat to information, part II: information collection in the gray zone 421
organization implementation guidelines for recovery of encrypted information 69

Information broker
netspionage — the global threat to information, part II: information collection in the gray zone 421

Information systems
achieving interoperability in a multiple-security-policies environment 267
information systems risk management: key concepts and business processes 234

Information warfare
the software colander — holes in messaging 692

Internet
America's Internet commerce and the threat of fraud 688
B2C security — be just secure enough 348
crimes and misdemeanours: how to protect corporate information in the Internet age 128
Internet targets 133
netspionage — the global threat to information, part I: what is it and why I should care? 326
romancing the Internet and management's quagmire 591
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Interoperability
a common key recovery block format: promoting interoperability between dissimilar key recovery mechanisms 41
achieving interoperability in a multiple-security-policies environment 267
global interoperability for key recovery 48

IPSEC
key recovery header for IPSEC 86

ISAKMP
ISAKMP key recovery extensions 91

Key generation
generation of RSA keys that are guaranteed to be unique for each user 282

Key recovery
a common key recovery block format: promoting interoperability between dissimilar key recovery mechanisms 41
additional key recovery functions 37

Subject Index Vol. 19

cryptographic information recovery using key recovery 21
features, attributes, characteristics, and traits (FACTs) of key recovery schemes/products 28
global interoperability for key recovery 48
ISAKMP key recovery extensions 91
key recovery functional model 31
key recovery header for IPSEC 86
organization considerations for retrieval of stored data via key recovery methods 82
public key infrastructure: analysis of existing and needed protocols and object formats for key recovery 56
SSL/TLS protocol enablement for key recovery 100

'Keystone'
securing the electronic market: the 'Keystone' public key infrastructure architecture 731

Legal issues
netspionage — part III: the black zone, who uses netspionage, how and why 505
romancing the Internet and management's quagmire 591

'Love Bug'
love conquers all? 408

Management
a biometric standard for information management and security 428
information security management: a hierarchical framework for various approaches 243
romancing the Internet and management's quagmire 591

Measurement
information security — the third wave? 615

Mergers
implementing public key infrastructures in a dynamic business environment 230

Messaging
the software colander — holes in messaging 692

Metrics
information security — the third wave? 615

Millennium
new millennium, old failures 119

Misdemeanours
crimes and misdemeanours: how to protect corporate information in the Internet age 128

Mobility
security for remote access and mobile applications 149
security in a mobile world — is Bluetooth the answer? 321

Multiparty
multiparty biometric-based authentication 369

Multiple merchant transactions
a generic electronic payment model supporting multiple merchant transactions 453

Multiprocessors
information security in multiprocessor systems based on the X86 architecture 559

Netspionage
netspionage — the global threat to information, part I: what is it and why I should care? 326
netspionage — the global threat to information, part II: information collection in the gray zone 421
netspionage — the global threat to information part III: the black zone, who uses netspionage, how and why 505

Networks
a generic electronic payment model supporting multiple merchant transactions 453
a mathematical structure of simple defensive network deceptions 520

Object formats
public key infrastructure: analysis of existing and needed protocols and object formats for key recovery 56

Organization
organization considerations for retrieval of stored data via key recovery methods 82

Organizations
do you know your organization's Achilles Heel? 585

Passwords
methods for protecting password transmission 466
word association computer passwords: the effect of formulation techniques on recall and guessing rates 645

Payment model
a generic electronic payment model supporting multiple merchant transactions 453

Policy
achieving interoperability in a multiple-security-policies environment 267
implementing information security in the 21st century — do you have the balancing factors? 337
romancing the Internet and management's quagmire 591

Prime generation
generation of RSA keys that are guaranteed to be unique for each user 282

Privacy
the Internet and management's quagmire 591

Private key
ticket and challenge-based protocols for timestamping 551

Process certification
information security management: an approach to combine process certification and product evaluation 698

Product evaluation
information security management: an approach to combine process certification and product evaluation 698

Protection
a mathematical structure of simple defensive network deceptions 520
crimes and misdemeanours: how to protect corporate information in the Internet age 128

Internet targets 133
methods for protecting password transmission 466
netspionage — the global threat to information, part I: what is it and why I should care? 326

Protocols
public key infrastructure: analysis of existing and needed protocols and object formats for key recovery 56
SSL/TLS protocol enablement for key recovery 100

Public key
ticket and challenge-based protocols for timestamping 551

Public key infrastructure
implementing public key infrastructures in a dynamic business environment 230
public key infrastructure: analysis of existing and needed protocols and object formats for key recovery 56
securing the electronic market: the 'Keystone' public key infrastructure architecture 731

Recall rate
word association computer passwords: the effect of formulation techniques on recall and guessing rates 645

Recovery
cryptographic information recovery using key recovery 21
organization implementation guidelines for recovery of encrypted information 69

Remote access
security for remote access and mobile applications 149

Risk
fireworks, beer and old halfpennies — the risks of assumption 499

Risk analysis
a practical risk analysis approach: managing BCM risk 596

Risk management
information systems risk management: key concepts and business processes 234

RSA
generation of RSA keys that are guaranteed to be unique for each user 282

Scamming
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Security
a biometric standard for information management and security 428
a formalized approach to the effective selection and evaluation of information security controls 185
a generic electronic payment model supporting multiple merchant transactions 453
achieving interoperability in a multiple-security-policies environment 267
B2C security — be just secure enough 348
crimes and misdemeanours: how to protect corporate information in the Internet age 128
do you know your organization's Achilles Heel? 585
fireworks, beer and old halfpennies — the risks of assumption 499
implementing information security in the 21st century — do you have the balancing factors? 337
information security — the third wave? 615
information security in multiprocessor systems based on the X86 architecture 559
information security management: a hierarchical framework for various approaches 243
information security management: an approach to combine process certification and product evaluation 698
information systems risk management: key concepts and business processes 234
Internet targets 133
netspionage — the global threat to information, part I: what is it and why I should care? 326
opening up the enterprise 710
securing the electronic market: the 'Keystone' public key infrastructure architecture 731
security for remote access and mobile applications 149
security in a mobile world — is Bluetooth the answer? 321
the software colander — holes in messaging 692
word association computer passwords: the effect of formulation techniques on recall and guessing rates 645

Slandering
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Subject Index Vol. 19

Smurfing
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Software
the software colander — holes in messaging 692

Spamming
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Spoofing
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Squatting
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

SSL/TLS
SSL/TLS protocol enablement for key recovery 100

Standards
a biometric standard for information management and security 428

Supervision
authentication and supervision: a survey of user attitudes 529

Surfing
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Surveys
authentication and supervision: a survey of user attitudes 529

Swamping
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Systems evaluation
information security management: an approach to combine process certification and product evaluation 698

Takeovers
implementing public key infrastructures in a dynamic business environment 230

Targets
Internet targets 133

Telecommunications
telecommunications crime — part 3 141

Threats
netspionage — the global threat to information, part I: what is it and why I should care? 326
netspionage — the global threat to information, part II: information collection in the gray zone 421
the software colander — holes in messaging 692

Timestamping
ticket and challenge-based protocols for timestamping 551

Traits
features, attributes, characteristics, and traits (FACTs) of key recovery schemes/products 28

User attitudes
authentication and supervision: a survey of user attitudes 529

User dependence
generation of RSA keys that are guaranteed to be unique for each user 282

Viruses
love conquers all? 408

Websites
fireworks, beer and old halfpennies — the risks of assumption 499

Word association
word association computer passwords: the effect of formulation techniques on recall and guessing rates 645

World Wide Web
love conquers all? 408
smurfing, swamping, spamming, spoofing, squatting, slandering, surfing, scamming and other mischiefs of the World Wide Web 312

Worms
love conquers all? 408

X86 architecture
information security in multiprocessor systems based on the X86 architecture 559
